

band's salary for the year of their death (\$2,700 and \$7,115) were agreed to without question.

The reading of the bill finished, the reserved amendments were taken up, the first being the series in reference to the world's Columbian exposition. The committee amendments were the world's fair was agreed to.

The next series of reserved amendments were those for the improvement of rivers and harbors, the first being a reduction of the amount for harbor improvements from \$500,000 to \$100,000. The amendment was opposed by Mr. Quay and Mr. McPherson on the ground that the proposed reduction would interfere seriously with the progress of the work.

At 2 p. m. the unfinished business, the Navigation bill, was laid before the senate, but at the request of Mr. Gorman it was laid aside temporarily, and the consideration of the sundry civil appropriation bill was proceeded with.

The only proper way of dealing with these public works, Mr. Fry argued, was to authorize the secretary of war to make contracts for the entire work.

Mr. Allison of Iowa addressed the senate in defense of the action of the committee on the subject of river and harbor improvements. The bill, as it came from the house, appropriated in the aggregate \$1,000,000. The committee did not, could not, the government was not sufficient to maintain its expenditures, and the committee thought it its duty so to scrutinize the bill as to make the expenditures, if possible, within a fair expectation of the year's revenue.

The committee was not willing and he was not willing to recommend an appropriation of \$2,000,000 for rivers and harbors for two years. He submitted to the senate that he was prepared now to appropriate for that purpose nearly twice as much as should be appropriated in former years. Was there, he asked, anything in the condition of the country or of the treasury to justify appropriating one-tenth of the revenue of the government for river and harbor improvements? He could not justify himself in voting for such large expenditures.

The discussion was still going on and Mr. Allison was on the point of finishing his speech, when at 3:30 Mr. Prudden, one of the secretary's of the president of the United States, appeared as the bearer of a message. As soon as it reached the vice president Mr. Sherman, knowing that related to Hawaiian matters, moved to proceed to executive business. The motion was agreed to, the galleries were cleared and the senate was left to discuss the Hawaiian question in secret.

The doors were reopened at 4:15, and then the business of the senate was suspended in order that a tribute might be paid to the memory of the late Representative McDonald of New Jersey, who died on November 5 last. The usual resolution of regrets were offered by Mr. McPherson, and agreed to, and the senate at 5 p. m. adjourned until tomorrow at 11 a. m.

There is no record of a marriage license being issued from the clerk's office, but the alleged bride has been seen surreptitiously in and out of the county office during the past two or three days, apparently to guard the matter. Tonight it is learned that they were quietly married in that town by the Rev. Geo. A. Wain of the congregational church, and they are now receiving congratulations from many friends. The parents of the girl were opposed to the match, consequently the elopement. A SUNNY NATURE.

Lovely Woman's Best and Greatest Charm.

What a Bright and Attractive Woman Has to Say to Her Sisters.

How a Happy and Joyous Nature Can Be Acquired.

Women make the sunshine of life. Did you ever watch the flowers turn with irrepressible persistence toward the sunlight? So does the bright, joyous, sunny nature of a woman irresistibly attract all to her light-hearted, merry and buoyant spirits.

Such a nature makes glad the heart; it makes happy the time.

For a man, all the anxiety of business, the weight of care, the gloom and depression of spirits are dispersed as clouds by the sun before the bright smile of a joyous, happy wife.

And it follows no less surely that a cross woman, one never pleased, always fault-finding, discontented and unhappy, will repel all who approach her, and make those who should love her shrink from her society.

Now, the first requisite of good nature is good health. No one out of health can have bounding spirits and feel particularly good-natured.

If a woman feels nervous, weak, tired, languid, lifeless and miserable, experiences a faintness, sense of fullness after eating, has irregular appetite, constipated bowels, frequent headaches, wakeful or disturbed and unrefreshing sleep, weak back, backache, dragging down pains, irregularities, female weakness, any or all of these, it is impossible for her to be light-hearted and happy.

And in the spring these feelings are very prevalent because of the torpid condition of the system after the winter. She must be cured first, and, with returning health, her old-time spirits will come back.

If women will follow closely the advice and example of our bright and attractive correspondent, Mrs. Elmer Craig, of Lansing, they can easily attain both health and good spirits.

"The music is appropriate, and the Florida song must be widely acceptable to those who are looking for a winter home. The song is a gem, and it is a pity that it is not more widely known. It is a song that is worth having."

After our part is done in organizing the service and collecting the goods the growth of the business depends on one thing only:

THE COMPREHENSION OF THE STORE BY THE PEOPLE.

Of this we have ample proof daily. Yearly increasing business also verifies the fact that Grand Rapids people are keenly intelligent and appreciative.
